

# SELECTING & QUERYING BY LOCATION

## LET'S GET STARTED!

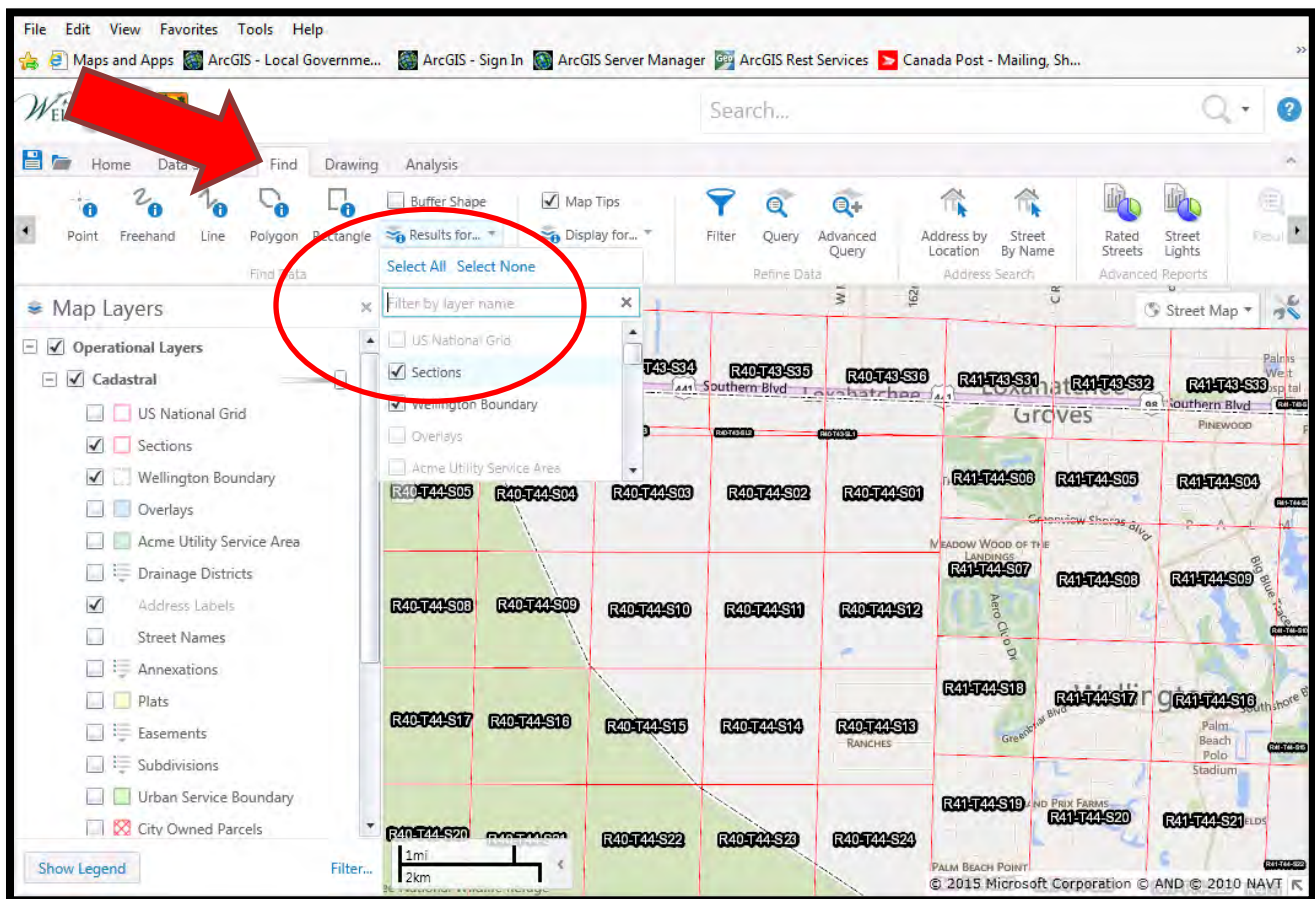

### Step 1 – Visit Wellington Interactive GIS Map

- ❖ Launch Interactive GIS Map

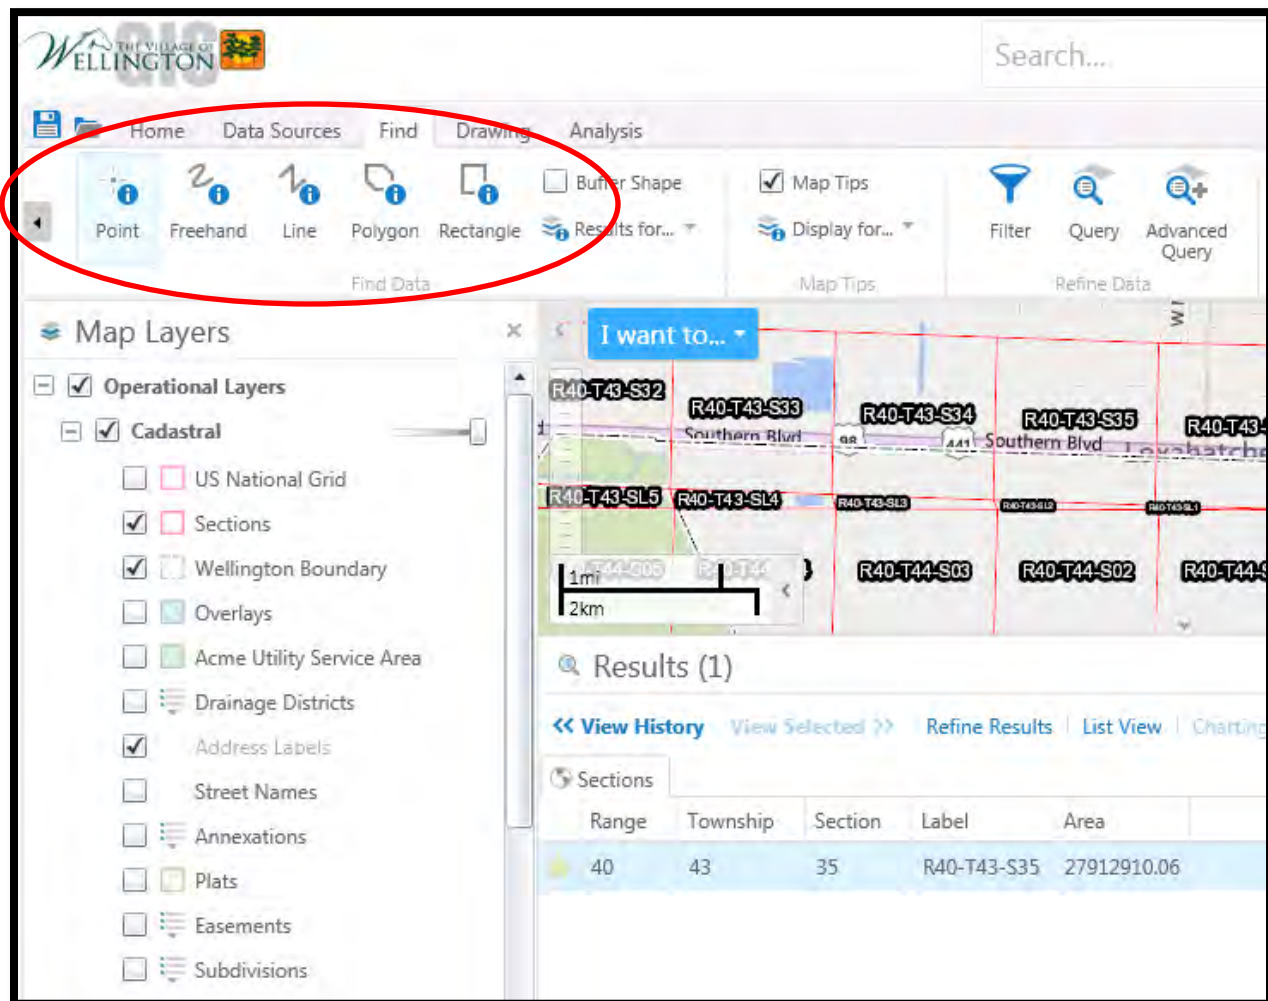

### Step 2 – Selecting Features

*(for this exercise we will use the Sections layer; you can use any layer to get your result)*

- ❖ Turn on Sections layer → Click Find tab at top
- ❖ Under Results for drop down click Select None (blue text), then check Sections only

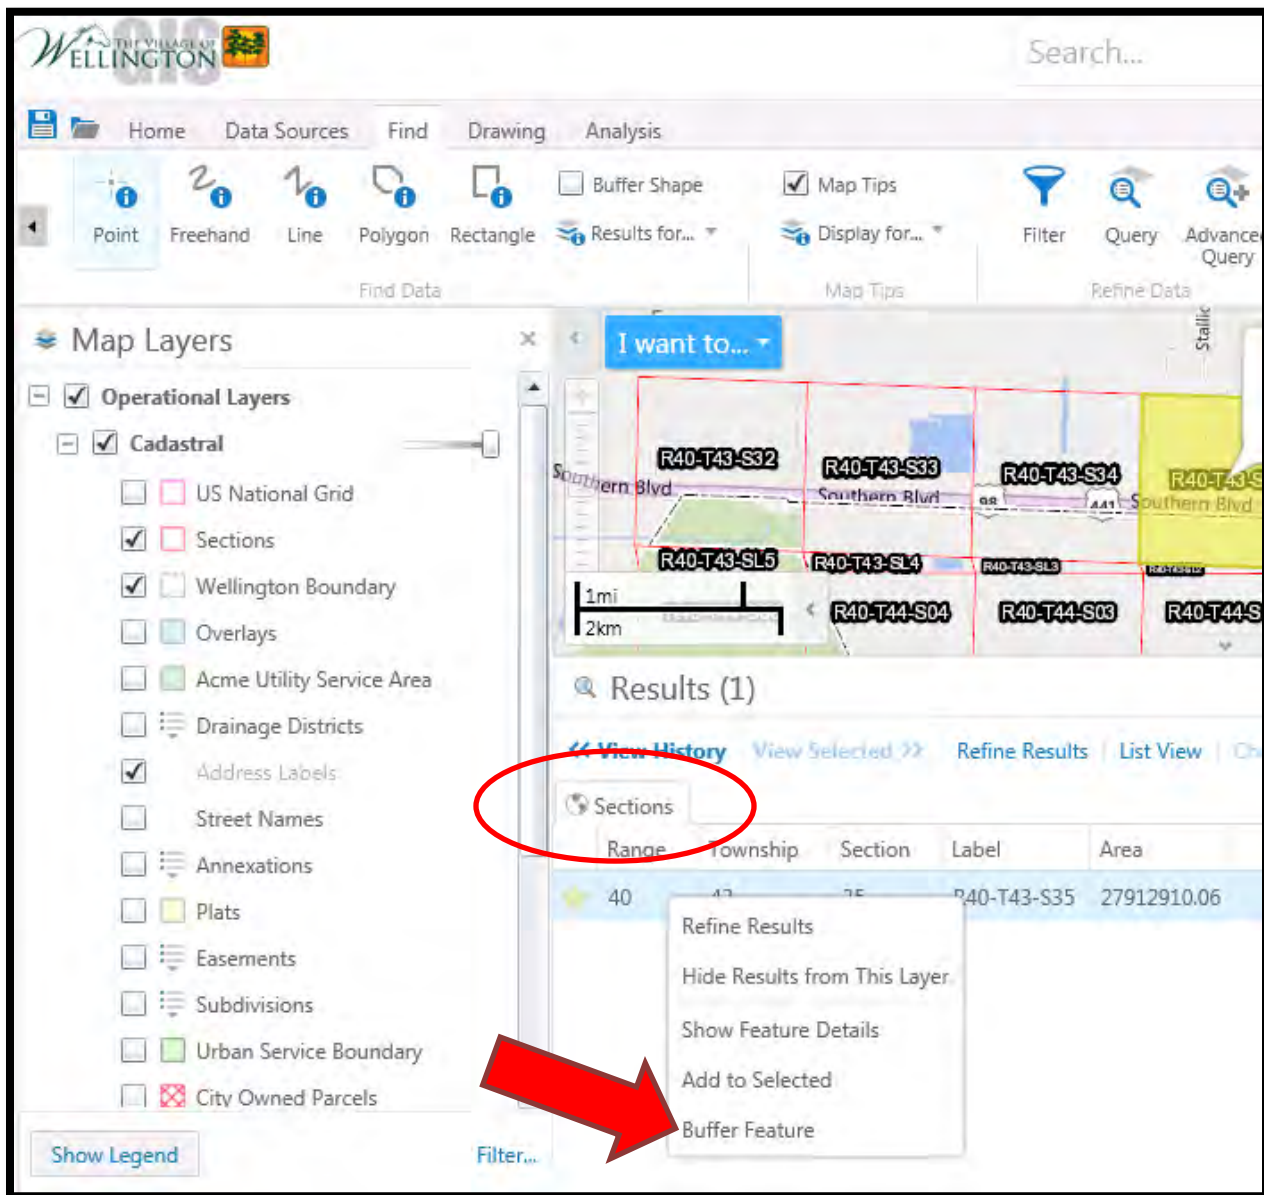

- ❖ Click on the one of the Identify buttons → Then click on the map to select the section(s) you need

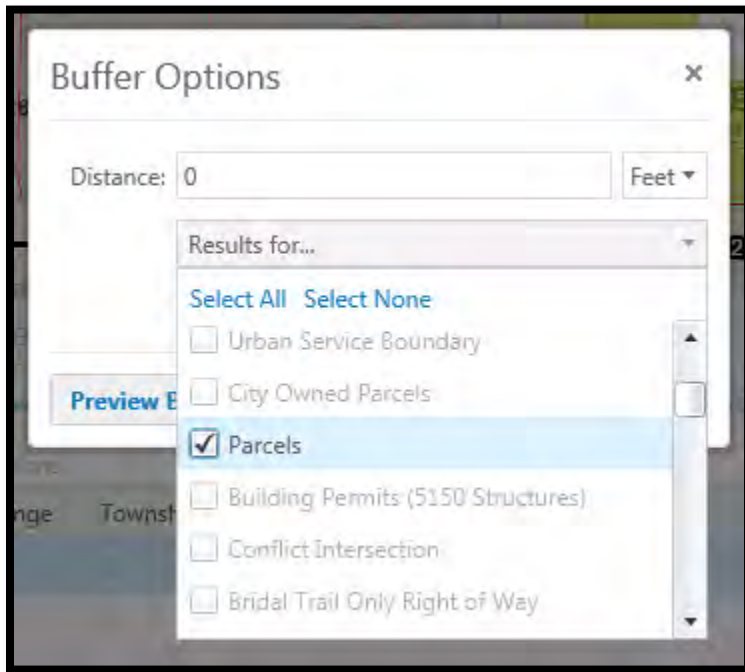

### Step 3 – Selecting by Location

*(to select features within or in a distance of your selected feature)*

- ❖ Make sure you're on the sections tab at bottom in Results
- ❖ Right click on the section you have selected and choose Buffer Feature

- ❖ For Distance: 0 (this means you are ONLY selecting what is within that section)
  - Change distance to any number you like to search within that measurement from the section edge
- ❖ Results for: click Select None (blue), then check parcels only
  - You can select any layer you want to query, such as addresses; you can also select multiples layers, such as parcels & addresses
  - **NOTE: The layer must be checked on or visible in the table of contents on the left of the map to view in the selectable features list**
- ❖ Hit OK

- ❖ Results will show at bottom (if you have selected more than one layer to return, you will see tabs showing each)
- ❖ You can export to CSV or run report

Results (14)
